Summary

I am a hard worker, I pay attention to detail and learn fast on how to adapt and get things done, those traits I picked up when I did my first work experience for a Web and design studio which I enjoyed and learnt about myself and what potential I have in a working environment. I have interests in understanding the web of how everything links together to make a successful organization, upon understanding and coming up with the best ways of handling work related issues.

Skill Highlights

- Project management
- Python
- Css
- Html
- Strong decision maker
- Complex problem solver
